

Due: Monday February 25 at 12Noon – One Attempt Submission

An electronic games wholesale supply company offers discounts depending on the quantities ordered. Minimum quantity is five (5) games. Each game is priced \$30. Quantity discounts are given according to the following table

Quantity	Discount
5-10	15%
11-15	20%
16-20	25%

The company also offers a further discount of 3% if the order is done during a city's holiday (see table below).

Create a Web page for this company where the customer enters the number of games he/she wants to purchase. The app should then display the amount of the discount and the total amount of the purchase after the discount. Also, if the order is done during one of the holidays then an “announcement” of the extra discount should stand out of the page.
